Ophthalmology in the German-Speaking Countries during the 20th Century

By

Thilo von Haugwitz

Translated by Frederick C. Blodi

&

Donald L. Blanchard

Part 1: FROM THE TURN OF THE CENTURY TO THE OUTBREAK OF WORLD WAR

<i>Introduction</i>	13
Hirschberg's Evaluation and Allvar Gullstrand	15
Glaucoma	23
The First Advances in Diagnosis	23
The State of Medical Treatment	29
Surgical Treatment	30
Surgical Procedures for Other Eye Diseases	40
Cataract	40
Keratoplasty	48
Retinal Detachment	48
New Aspects of Visual Physiology	54
Color Vision	54
Dark Adaptation	59
Central Visual Acuity	60
Binocular Vision	65
Neuro-Ophthalmology	71
Ludwich Bach	71
Hermann Wilbrand	73
Hereditary Diseases	73
The "Handbuch" and the German Language	77
Ophthalmic Therapeutics	78
Topical Medications	78
The Use of Electricity	80
Light Therapy	88
Thermal Therapy	91
Radiotherapy	93
Tuberculosis and Syphilis	94
Precision Mechanical-Optical Industry	97
Contact Lenses	111
The Visually Handicapped and the Blind	120
The Influence of Social Legislation on Ophthalmology	122

Part 2: 1914-1945	131
World War I	133
The Social Aspect of the Postwar Years	142
Provisions for Veterans with Service Connected Disabilities	142
Statistics on Blindness	143
Determining Disability Compensation	145
Further Development of Social Legislation	153
Renewed Interest in Contact Lenses	156
Unorthodox Methods	159
The Bates' Theory	160
Iris Diagnosis	163
Advances in Glaucoma	164
Old and New Theories and Therapies	164
Additional Diagnostic Methods	166
New Surgical Procedures	173
Other Procedures to Measure Pressure and Standardize the Instruments	175
Perimetry	178
Dynamometry	185
Medical Treatment of Cataracts	188
Jules Gonin and the Detachment Operation	193
The Discovery of the Herpes Virus	197
Diabetes Therapy with Insulin	199
Sensory Physiology	210
Alfred Bielschowsky's Concepts	212
A More Subtle Fundus Diagnosis	218
Arteriosclerosis and Hypertension	218
The Discovery by Junius and by Kuhnt	222
Beneficial and Harmful Effects of Light	228
Advances in Radiology	232
Tuberculosis	236
Allergy and Focal Infection	240
Precision Mechanical-Optical Industry	246
Further Concepts on Hereditary Diseases	255
The National Socialists and Their New Laws	259
The Introduction of Sulfonamides and Penicillin	265
Isolation and Collapse	266

Part 3: THE SECOND HALF OF THE CENTURY	269
A New Beginning for Glaucoma	271
Perimetry	271
Advances in Tonometry	277
Tonometry and Rigidity	277
Tonography	283

Therapy	287
New Medications	287
<i>Addendum: Gonioscopy</i>	289
Pressure-Lowering Operations	289
The Renaissance of Strabismus Treatment	295
New Concepts in Diagnosis and Therapy	295
Strabismus Operations	303
The Development of (Micro-) Surgery	309
Cataract Operations	311
Keratoplasty	317
<i>Addendum: Fjodorow's Keratotomy</i>	318
The Treatment of Retinal Detachment	318
<i>Addendum: Vitreous Surgery</i>	326
Intraocular Foreign Bodies	330
New Medications	333
Sulfonamides	333
Antibiotics	333
Virostatics	334
<i>Addendum: AIDS</i>	335
Corticosteroids	336
New Examination Methods	337
Nuclear Medical Diagnosis	337
Computerized Tomography	338
Magnetic Resonance Imaging	339
Electrodiagnosis	341
Electroretinogram	341
Electrooculogram	343
Ultrasound	343
Fluorescein Angiography of the Fundus	345
Social Aspects of Ophthalmology	347
Welfare for the Blind and Visually Handicapped	347
Social Welfare Laws in West Germany	355
Social Welfare Laws in East Germany	355
Changes in the Health Care Delivery Systems	359
The Clinics	359
The German Professional Society of Ophthalmologists (Berufsverband der Augenärzte, BVA)	363
Increasing Importance of Industry for Ophthalmology	376
New Methods to Manufacture Contact Lenses	376
The Reconstruction of the Optical Industry	378
<i>Addendum: France</i>	383
Standardization and Calibration	384
The Law on Measurements and Calibrations	389

Literature	391
Index	411-424
